

Deployment Pool & Deployment Groups

Teams need to raise their request through https://tal.service-now.com/tal_portal?id=sc_cat_item&sys_id=950a30f0dbb94498e1b952e3449619e8

- Deployment Pool exists at the account level and is the actual container of the deployment agents (targets)
- Deployment Pool will be named as <PlatformName>.<POD>.<ENV> e.g. GLS.GRP.DEV1, GLS.GRP.DEV2
PlatformName should be one of these values:

Group - **GLS**

Retail - **RLS**

Digital - **Digital**

Data and Analytics - **DnA**

Claims - **CLM**

Direct - **DIR**

Cyber - **CYB**

Continuous Delivery - **CD**

- Deployment Pool can be shared across multiple projects

Deployment pools >  GLS.GRP.DEV1

Details Targets 2 |  Save  Security

Name

GLS.GRP.DEV1

Projects with dependent deployment groups

TAL.GLS.UWPlus.Web	
TAL.GLS.UWPlus.Service	
TAL.GLS.SSO.Service	
TAL.GLS.Myvalidation.Service	
TAL.GLS.Notification.Service	
TAL.GLS.Application.Service	

- Deployment Group name is generated as <ProjectName>-<DeploymentPoolName>
